## EVENT COMMITTEE

**Melinda Fricke**  
*Chair*

Gastric cancer remains to be one of the *most common malignancies worldwide* with almost a million new cases diagnosed each year. It is also one of the *world's leading causes of cancer-related death*. It is estimated that we will see over 20,000 new cases of stomach cancer *this year in the U.S.* with over 10,000 deaths resulting from the disease. And although cases of gastric cancer in the U.S are decreasing overall, an unexplained rise in gastric cancer in Americans under age 40 has occurred. Because of the smaller number of cases relative to other cancers, gastric cancer receives very little federal funding and few resources devoted to researching a cure.

Per cancer death, stomach cancer receives the least amount of federal funding of any cancer and there is very little research being conducted on stomach cancer for a variety of reasons, including a lack of funding and a limited number of doctors specializing in stomach cancer. This event raises money specifically for exploratory research and innovative treatment options in this field. Since our inception Stupid Strong has partnered with leading advocacy groups such as the Baylor Healthcare Foundation, Debbie's Dream Foundation, and Gastric Cancer Foundation to focus efforts on our mutual mission: to end gastric cancer. Sadly, there is much work still to be done.

Stupid Strong is a 501(c)(3) not-for-profit organization dedicated to raising awareness about gastric cancer and advancing funding for research and new treatment options. Stupid Strong exists for the purpose of making the cure for stomach cancer a reality. [www.stupidstrong.org](http://www.stupidstrong.org)
